

# LINKABLE FLOOD LIGHT PROLINK

The Prolink is an ultra-efficient LED track light designed to avoid light loss, maximize coverage of the area to be lit and minimize light pollution.

The kit includes a lighting head with cable, a 3 meters mast, and a base. To illuminate an area of 100m in length, we recommend using 10 PROLINK kits spaced 10 meters apart. The range offers adjustable beam angles to provide optimal lighting for specific tasks, as well as energy-efficient and long-lasting LED technology. Finally, you can light a work area or construction site with just one power pack.

## Technical characteristics

### Electric

Power supply per projector	15W
Voltage	230V
LED's lifetime	50 000 hours
Instant power on	Yes

### Security

Protection index	IP65
------------------	------

### Photometry

Total Lumens	3 300 lm
--------------	----------

### Mechanical

Weight	7,4 Kg
Optimum height for use	3 m
Average assembly time	2 minutes

### Options & accessories

Twin light head adapter C	In option
Magnetic holder	In option
Ground spike for mast	In option
